## A nationally recognized outdoor living company doing business the right way!

Owners Matt and Jessica Lane at Proficient Patios and Backyard Designs know how to do business the right way! They have been serving the Las Vegas area for 15 years and have numerous five-star reviews by their customers. Best of the Best has given them national recognition and they've received the gold standard in customer service and outstanding workmanship.

Matt and Jessica started their family-owned business working from home. Their story is one of those great American success stories that proves hard work pays off. In the beginning, like a lot of small business owners, they did everything themselves. They grew from just a few employees to now having over 80 employees. They are one of the most respected of their kind in America and have won many national recognition awards.

In today's crazy busy world, it's often hard to find time to shop, especially if you have to go to multiple stores. However, if you're looking for all things backyard, they are literally your "One-Stop-Shop." From patio furniture to outdoor kitchens and spas, patio covers, landscaping, concrete, fire and water features, sunrooms, and much more.

Worried about contractors? No need here. They have a full-time professional crew so they know the job gets done right. They

don't hire subcontractors like many of the other outdoor living businesses. Jessica says, "Professionalism and reputation are of the utmost importance. So many people don't like working with contractors because they never know what they're going to get. We have an A record through the BBB and Las Vegas Chamber of Commerce and that is important to us. We take our customers very seriously."

They are licensed contractors in six different trades, which cover all their backyard work: general contracting, patio cover/awnings, landscaping, concrete, masonry, and stucco license. Matt adds, "Our customers know they only have to work with one company and we know our employees will do the job the right way."

Their 25,000 square-foot showroom is absolutely beautiful and a must-see. They also have an awesome design team that can help you come up with your own custom design and they can do 3D renderings so you can see what it looks like before they even start on your project!

If you're looking for peace of mind, they back their work with a one-year workmanship warranty, which when combined with product warranties, will allow you to feel confident in your investment.

If you're looking to extend your home outdoors, or update your outdoor space, stop by their showroom and you'll be amazed!
